
STOP THE SPREAD OF INVASIVE PLANTS!

Weed seeds and plant parts can become lodged in tires, behind the license plate, or in cracks and crevices on the underside of the vehicle and on clothing. Seeds may travel hundreds of miles before dislodging in an area where they were not previously found.

HELP

by staying on trails, avoid traveling through weed infested areas, and always check for and clean mud, weed seeds, and plant parts from your vehicle and equipment before leaving the trail.

HELP US PROTECT OUR FORESTS BY
PREVENTING THE SPREAD OF INVASIVE PLANTS
